

NexAir has an Audio Panel Deal for You!

~PS Engineering Introduces the PMA8000C~

**NexAir Avionics is offering the PMA8000C with its improved technology,
low install time and trade-in for old equipment (GMA 340)!**

(This offer good for the month of November 2011 Only)

This is the time to get the Audio Panel you've always wanted!

What's New You Ask? There have been several instances where having a 3rd comm would have allowed the PMA8000BT to be installed, but since we originally took that channel and made it a telephone channel, we lost that capability. Enter Bluetooth.

How Much You Ask? This is the part you're really going to love! Not only does this install take about one hour of labor to remove your Garmin GMA340 and replace with it with a PS Engineering PMA8000C but with a list price of \$2195, it's just \$100 more than the PMA8000BT. *AND*, NexAir will OFFER \$500 IN TRADE FOR YOUR GMA340!

*Now you can have the 3rd Com, telephone,
AND streaming music at the same time.*

and

The new PMA8000C will begin shipping by the end of 2011—reserve your PS Engineering Audio Panel and time slot with NexAir Avionics today!
(This offer also available for PMA8000BT, Available Now)
